DETAILED ACTION

I. Rejection of claims 1,6-9,17,21,23,26,30-33 under 35 USC 103(a) will not be maintained in light of amendment filed 11/17/04. Applicant has amended claims to recite that the encasement coat is non-permeable which is not taught by the prior art.

II. Applicant's arguments filed 11/17/04 have been fully considered but they are not persuasive. See arguments below.

Objection to the Specification for having New Matter will be maintained for reason on record and reason as follows. Applicant admits that microcrystalline cellulose was deleted as being a compression aid and is now listed as an extrusion agent in the amended specification. Applicant argues that the amendment was done to the original specification because microcrystalline cellulose was inadvertently listed as a compression aid instead of an extrusion aid. Applicant argues that any one having ordinary skill in the art would have known that microcrystalline cellulose is an extrusion aid. Applicant also provides USPN 4976846 , which categorizes microcrystalline cellulose as an extrusion aid. Examiner argues that microcrystalline cellulose has many functions in the art and that microcrystalline cellulose does not always function as an extrusion aid. Based on this fact, Examiner must cite the amendment to the original specification as new matter.

III. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 1616

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,6-9,11,15-17,21-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

New Matter is "extrusion aid may be microcrystalline cellulose". Although this quote is not cited in the claims, the body of the specification has been amended to recite this quote. The amendment to the specification's body will impact the scope of the extrusion aid mentioned in the claims. For this reason the rejection is made.
